

AQUATIC INVASIVE SPECIES

Transferring invasive species between bodies of water is a concern to all anglers. Please take the time to review the following lists of infected waters.

This summer a new state law requires boaters to drain water before leaving any state waters or face fines up to \$1000. Boaters are required to:

- Remove aquatic plants and zebra mussels from boats and trailers.
- Drain all water including pulling the drain plug, open other water draining devices, and drain bilges and livewells.

It is now illegal to trailer a boat on a public road with the drain plug in.

LAKE MINNETONKA ANGLERS. The Lake Minnetonka Conservation District requires that boats that have been in ANY waters containing ANY aquatic invasive species – especially zebra mussels (Mille Lacs, St. Croix, Mississippi, St. Louis River, Lake Superior) – in the 30 days prior to putting in at Lake Minnetonka, be dry for a minimum of 5 days. A list of infested waters can be found at www.LMCD.org, www.twincities-muskiesinc.org, or in your tournament program. Boats must be cleaned and certified by the LMCD if they don't meet this requirement. Contact the Lake Minnetonka Conservation District at 952-745-0789 to make arrangements to have your boat certified before the tournament if you won't meet the requirement. The special event certification form in your tournament packet MUST BE filled out and turned in at the Awards Program or mailed back before the tournament, OR you must turn in a LMCD certification form at the Awards. If you don't turn in any of the forms, any fish registered will not count.
